NO

If the water network is extended, will you request a new connection to the Council supply?

NO

Do you have any other feedback comments?

I don't think if we choose not to connect that our current fire protection rate should increase from \$167.71 to \$268.23. If you are connected then you get a decrease from \$1,271.80 to \$536 how is this fair?? I would be happy to see waste water being introduced here instead of septic tanks I feel that is more important.

YES

If the water network is extended, will you request a new connection to the Council supply?

YES

Do you have any other feedback comments?

Currently our Preschool has over 40 children who attend ECE Monday to Friday. We currently have a UV water treatment system but have our water supplied by a neighbouring farm. With the new water regulations we are unsure whether the Farmer would like to continue as a water provider. Our neighbouring properties could also be affected if the farm chose to stop providing water. Having council provide water to the whole village will ensure water safety and sustainability. Thank you for this initiative. Provides essential Fire Protection for whole village.

YES

Do you have any other feedback comments?

This is regards to 25 Forest View Road, Whakamaru.

Thanks to the council for providing the whole village with the opportunity to connect to town water supply. If ground water was to be contaminated by an ageing / leaching septic tank people could become sick. It could be hard to figure out where contamination was coming from with so many septic tanks.
